Undoubtedly they are the most solid professional pair of the moment, throughout the world recognized by their excellent production works, their coveted remixes and their marathon dj sets, where they capture their genuine Iberian character, a blend of styles in perfect harmony between House and Techno which common factor is the unmistakable beat of the percussions.

Pioneers and creators of the movement underground known as 'Iberian Sound', with which they opened an important gap for a whole saga of artists and producers who make Tribal a way of life, and which evolution has always led them to the top.

All these years of work and absolute dedication together with an undisputed professionalism and a constant renovation have led this infallible duo to the summit of success. A legacy of invaluable value where the blend of styles is their dogma and the quality, their message.
